

Nebula Tide

Ambient drone-pad virtual instrument — standalone app & audio plugin

3 · MAIN INTERFACE

Primary interface — Windows standalone v1.3.0, idle. Left star = FX layer · right star = texture layer · centre = active preset · orbit = the 12 keys · footer = volume, reverb, crossfade, pan.

4 · VISUAL / UX IDENTITY (as built)

Palette	Navy ground, foam text. Accent is dynamic per preset (cyan default); FX gold and texture red are fixed
Surfaces	Glass panels, 18–22 px radius, over an animated starfield
Type	Platform sans, uppercase, wide tracking; none bundled
Controls	Text-only buttons · rotary knobs with bloom halo and value arc · 6 px sliders. Hover brighter, selected bloom, active breathing
Patterns	No dropdowns (arrows) · no tabs (Settings overlay) · no meters — level drives the starfield
Motion	60 fps starfield, aurora, breathing pad, colour morph, bloom; OpenGL on desktop
Feel	Calm, cinematic deep space; dark, luminous, minimal chrome

6 · STANDARDIZATION NOTES

KEEP — PRODUCT-SPECIFIC - Space/tide identity & naming - Per-preset full-UI retint - Key-planet orbit selector - Star FX / texture players - Audio-reactive starfield	STANDARDIZE ACROSS STUDIO - Colour token names & roles - Type scale and tracking - Knob / slider / button components - Settings overlay pattern - Right-click MIDI-learn - Update-check client + schema - Encrypted container & packer	MISSING — COMPANY INFRASTRUCTURE - Amanorsac account · licensing - Searchable preset browser - About screen & visible version - Legal / privacy links in-app - Accessibility: no screen-reader labels, no reduced-motion - Crash reporting · localization - In-app help / onboarding
--	---	---

Scope. As built on 2026-09-01. Desktop is released and in use; mobile builds compile but are unpublished and not device-tested. Absent work appears only under Missing. No credentials or secrets are referenced.

1 · PRODUCT IDENTITY

Category	Virtual instrument — standalone + VST3 / AU / AUv3
Purpose	A sustained harmonic bed in the right key, in one click
Users	Worship musicians & MDs · ambient producers · live performers
Status	Released on Windows & macOS via direct download; iOS/iPadOS & Android build but are unpublished

2 · WHAT IT DOES

- **12 real recorded keys per preset** — never pitch-shifted
- **Key "planets"** orbit selector — click to crossfade into a key
- **Two star players** — FX and texture, independent of the preset
- **Room / Plate / Hall** reverb · loop crossfade · volume · pan
- **MIDI & QWERTY** — 34 learnable actions, zoned keyboard, DAW gating
- **Living UI** — the interface re-tints to the preset colour

5 · TECHNICAL SNAPSHOT

Stack	JUCE 8.0.6 · C++17 · CMake + Projucer (Android); no third-party deps
Platforms	Windows 10+ · macOS 10.13+ universal · iOS 15+ · Android 7+, as Standalone / VST3 / AU / AUv3
Audio	Buffered playback; equal-power crossfades on loop, key and preset; <code>juce::Reverb ×3</code> ; constant-power pan
Content	Encrypted .ntlib (Blowfish-CTR), RAM only. FLAC 255 MB desktop / Ogg 94 MB mobile, shipped in the app
Privacy	No account, DRM, analytics or telemetry; one version-check call at launch
Build	GitHub Actions → Inno Setup · pkgbuild · APK/AAB
Signing	Android verified, Apple Distribution issued; Windows signing and macOS notarisation outstanding
Tooling	In-house Nebula Forge (preset authoring) and NebulaPack (container builder)
